# The 100, by category

# Placements that start fights

## **Larry Fink over the Chancellor of Germany**

BlackRock stewards ~\$12T. Capital outranks cabinet.

## **The Pope at #14**

1.3B faithful. Reach is power, not just office.

## **A US state governor over most of the G7**

California's economy is bigger than most nations'.

## **Kim Jong-un only in the 30s**

A bomb, but a small economy. The model's hardest call.

## HOW IT WORKS

# A model, not a magazine guess

- Score = the metro power of the place behind you, times how much you control.
- Fifteen categories, from heads of state to central bankers to Taylor Swift.
- One toggle hides the soft categories if you only trust office and money.
- Dated. Rebuilds itself every week from live data. No black box.
